FORM AND FUNCTION

Quality masks for
each individual need

FOR THOSE WHO ENSURE HEALTH AND CREATE BEAUTIFUL SMILES

Our proven, high quality, single-use infection prevention and control solutions for PPE, sterilization, office essentials, and preventive care are thoughtfully designed for simplicity and comfort without compromise to safety and clinical efficacy.

Making each day in your practice a little easier.

Founded in 1988 in response to the critical demand for high-quality medical gloves during the global HIV crisis, Medicom has consistently been at the forefront of infection prevention and control innovation.

Drawing on over 35 years of expertise, we have continuously evolved our mask technology and designs to better meet the wide array of individual needs and preferences.

Explore our extensive mask portfolio today and experience the difference that quality, innovation, and fit can make in ensuring your safety and comfort.

CHOOSING THE RIGHT MASK

Protection and comfort

The ASTM standard F2100-23 classifies masks into three levels based on their bacterial filtration efficiency (BFE), sub-micron particulate filtration efficiency (PFE), fluid resistance and breathability (differential pressure).

	Low Barrier ASTM Level 1	Moderate Barrier ASTM Level 2	High Barrier ASTM Level 3
BFE, at 3 microns	≥ 95%	≥ 98%	≥ 98%
PFE, at 0.075 micron	≥80%	≥ 85%	≥ 85%
Fluid Resistance	≥80 mm Hg	≥120 mm Hg	≥160 mm Hg
Differential pressure	< 5.0 mm H ₂ O/cm ²	< 6.0 mm H ₂ O/cm ²	< 6.0 mm H ₂ O/cm ²
Flammability	Class 1	Class 1	Class 1

Determine the level of barrier protection you need, taking into account factors such as procedure duration, amount of fluid or aerosol involved, and standard precautionary measures.

ASTM LEVEL 1*

- Low-risk exams
- Operatory cleaning/maintenance
- Orthodontics
- X-rays, impressions
- Lab trimming, finishing, and polishing
- Fluoride application

ASTM LEVEL 2*

- Limited oral surgery
- Endodontics
- Prophylaxis
- Bleaching/whitening treatments
- Restoratives/composites
- Sealants
- Scaling and root planing

ASTM LEVEL 3*

- Complex oral surgery
- Crown preparation
- Periodontal procedures
- Implants
- Using ultrasonic scalers
- Using high-speed hand piece
- Laser based applications

Form and function

Medicom offers a variety of general purpose, procedure and surgical masks in all three ASTM levels, and NIOSH-certified N95 surgical respirators. Our masks are not made with natural rubber latex and will not lint or tear during use.

Utility Face Mask

For general purpose use.
Not for clinical procedures.

Surgical Tie-on Face Mask

For dental/clinical procedures.

Procedure Earloop Face Mask

For dental/clinical procedures.

Surgical N95 Respirator

For treating patients with
known or suspected aerosol
transmissible diseases.

*Illustrative list based on publicly available data and information on common practice. Use clinical judgment for final selection of proper protection needed.

Available in US only.

Protective Apparel Best Practices

DONNING

- Perform hand hygiene before removing item from package.
- Select appropriate garment for intended use (length, coverage, fluid resistance, etc.)
- Fasten correctly.

DOFFING

- Remove apparel immediately after use and dispose in a designated receptacle. Do not re-use.
- Perform proper hand hygiene after removing apparel to prevent cross-contamination.

KEEP IN MIND:

- Protective apparel should not be worn in restrooms, personal offices or break rooms.
- Change protective apparel between patients and as soon as possible when penetrated by blood or other potentially infectious fluids.
- Turn garment inside out when removing to keep infectious material inside.
