

Use less. Get more. Go Further.

How far will a single OPTIM OS1 Wipe take you?

One OPTIM OS1 Wipe does the job of two of the leading quat-alcohol competitor wipes¹. Use less wipes. Get more coverage from every wipe.

Keep pace with your busy patient schedule.

COLTENEGROUP

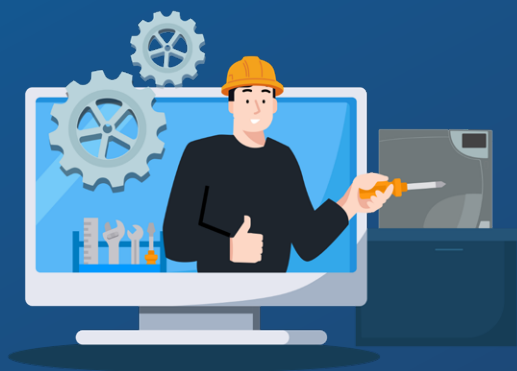

SciCan products purchased in refurbished condition, or under SciCan's discount programs do not qualify for quarterly promotions. Promotions are stand-alone and are only applicable for orders placed in the USA. They cannot be offered in conjunction with any other on-going dealer or end-user promotion and are only valid during the promotion period. STATIM is a registered trademark of SciCan Ltd. Request for rebate must be received by October 31, 2025 at www.scican.com/us/promotions. *Units acceptable for the trade-in are: STATIM Classic and G4, M11 and M9, Enbio, Tuttanauer, W&H. SciCan will be using a third-party to pick up of the trade-in units and will not accept deliveries to our offices.

Smarter Together

Optimize your equipment.
Empower your team.

Equipment with G4 Technology powered by the myCOLTENE web portal can improve your practice in many ways.

Device Support

Cycle Fault Notifications – If a cycle fault occurs, connected G4 equipment automatically sends data to our myCOLTENE cloud portal, so we can quickly help solve any issue.

6-Month Extended Warranty – We support not only your equipment but your success!

Automatic cycle fault email notifications to dealer service department or technicians from myCOLTENE (optional) – saving time, money, and potentially unnecessary service calls.

On-Demand Information

Become Equipment Experts – New staff might need a refresher. Search the latest digital versions of quick start guides, manuals, tutorials, troubleshooting and installation instructions for quick and easy explanations.

Stay Up to Date – Firmware updates are automatically sent to connected G4 equipment and easily installed with user approval.

Keep Equipment at Peak Performance – Your myCOLTENE dashboard tells you if a software update is available to download so you can be confident your unit is operating at its best.

Traceability

Secured Cloud Storage and Improved Records – All cycle data is stored on the unit's internal memory, in the cloud through the myCOLTENE web portal, and on the included USB, satisfying any local datalogging requirements.

Total Traceability for Teams – Tracking equipment use creates accountability and supports your office's reprocessing protocols. Enhanced settings enable comprehensive instrument tracking options for your infection control equipment.
